DETAILED ACTION

This Office action responds to the after-final amendment filed on 1/26/2004.

Acknowledgment

1. The amendment filed on 1/26/2004 responding to the Office action in paper no. 16, mailed on 8/25/2003, has been entered. The present Office action is made with all the suggested amendments being fully considered. Accordingly, pending in this Office action are claims 19 and 28-35.

Drawings

2. The drawings received on 1/26/2004 are accepted.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

4. The application has been amended as follows:

In the specification

Art Unit: 2814

On page 1, line 1 of the specification, insert --This is a divisional application of application serial no. 09/052,057, filed on 3/30/1998, now US Patent No. 6,285,054.--

Reasons for Allowance

5. Claims 19 and 28-35 are allowed.

6. The following is an examiner's statement of reasons for allowance:

The applicants (see, e.g., specification, pp.13/II.18-pp.14/II.16) teach that a corner-limiting diffusion step is the diffusion of impurity ions at the bottom corner of a trench formed in a semiconductor substrate. The source/drain impurity ions of a semiconductor device need to be implanted immediately contiguous to the sidewalls of the trench with the deepest dopant peak at substantially the same depth of the trench. A thermal annealing step causes the lateral diffusion of the implanted ions beneath the bottom surface of the trench. This diffusion is limited by the amount of dopants available at the bottom corner and by the radial nature of the diffusion process at said corner. As a result, only a low percentage of the source/drain dopants diffuse around the bottom corner of the trench, resulting in a corner-limiting diffusion process.

Based on the above source/drain forming description, none of the references of record shows or can be fairly combined to render obvious over a method wherein a step of forming the source/drain regions of a trenched-gate semiconductor device comprises a corner-limiting diffusion step.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2814

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
